Checklist for Appropriate Object Codes for OPSC – SFP Projects

For F&E there is an exception to the 6XXX object for capitalization norm. This is to facilitate getting F&E expenses on the correct depreciation schedules. They can be capitalized on an 8500 project for the initial essential equipping of the project.

There is no need to establish Eminent Domain object codes unless the LEA will be doing EmDom. Or a code for Moving Expenses can be added for tracking purposes within the Construction cost section and reported on the DLOPE as 4-4 or 4-5.
